Discussion and feedback done during Coffee with the Principal

-Parents asked questions about credit completion. They wanted it better defined for them and asked what they could be doing to support their child with credit completion.

-Parents are happy with the school. They like the option of their child attending the school and the resources it provides.

-Parents gave insight into the best way to contact them. Text and phone calls are best.

-Parents requested more resources be offered at the school for the parents/adults. More community partners for support.
